

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis of financial condition and results of operations, dated November 13, 2013 of Mood Media Corporation ("Mood Media" or the "Company") should be read together with the attached unaudited interim consolidated financial statements and related notes for the three and nine months ended September 30, 2013, the audited consolidated financial statements and the related notes for the year ended December 31, 2012, and the Company's annual information form (the "AIF"). Additional information related to the Company, including the Company's AIF, can be found on SEDAR at www.sedar.com. Please also refer to the risk factors identified in the Company's AIF. The fiscal year of the Company ends on December 31. The Company's reporting currency is the US dollar and, unless otherwise noted, all amounts (including in the narrative) are in thousands of US dollars except for shares and per-share amounts. Per share amounts are calculated using the weighted average number of shares outstanding for the three months ended September 30, 2013.

This discussion contains forward-looking statements. Please see "Forward-Looking Statements" for a discussion of the risks, uncertainties and assumptions relating to these statements.

As used in this management's discussion and analysis of financial condition and results of operation, the terms the "Company", "we", "us", "our" or other similar terms refer to Mood Media and its consolidated subsidiaries.

Overview

We are a leading global provider of in-store audio, visual and scent media and marketing solutions in North America and Europe to more than 570,000 commercial locations across a broad range of industries including retail, food retail, financial services and hospitality. We believe we benefit from economies of scope and scale, generating revenue from multiple product and service offerings across 41 countries. Our acquisitive growth history has allowed us to substantially broaden our geographic footprint and significantly strengthen our product and service offerings. Our strategy of combining audio, visual and scent media has helped our clients enhance their branding, drive impulse purchases of their products and improve the shopping experience for their customers. We believe that the breadth and depth of our customizable offerings and the quality of our customer service has helped make us the preferred media and marketing solutions provider to more than 850 North American and international brands. We believe that we are viewed as an established distribution network by music producers, performance rights organizations and third-party advertisers.

If you play music in your business for your staff or customers, by law you need permission from the relevant copyright owners. Each country has its own legal system, for this reason a lot of music users don't pay the licensing fees due and are infringing the copyrights rules. We have worldwide experience and extensive knowledge of the various licensing systems throughout the world. We understand all licensing fees due as a music content provider and can provide support to our customers to obtain the relevant local licenses.

In-store audio, visual and scent media and marketing solutions create a communication channel between our clients' brand and their customers at the point-of-purchase. By enhancing the brand experience of our clients' consumers and establishing an emotional connection between our clients and their consumers, these products and services can have a direct impact on consumer purchasing decisions. We can tailor both our media's content and delivery by scheduling specific content to be delivered at a specific time in order to target a specific audience. Our media is broadcast through customizable technology systems, supported by ongoing maintenance and technical support and integrated into our clients' existing IT infrastructure. The tailored content we deliver eliminates the need for our clients to select their own, often repetitive, background media.

Our common shares are listed on the Toronto Stock Exchange ("TSX") and the AIM Market of the London Stock Exchange ("AIM") under the trading symbol "MM" and our 10% convertible unsecured subordinated debentures are listed on the TSX under the trading symbol "MM.DB.U."

We started as a Canadian private-label music aggregation and distribution company called Fluid Music Canada. In October 2007, we acquired Trusonic, Inc., now Mood Media North America, Ltd. ("MMNA"). MMNA, founded in 1999, was a spin-off of MP3.com's in-store media assets, which included a non-exclusive license to a library of approximately 1.5 million "rights-included" tracks produced by independent artists, proprietary technology (the mBox), and software to deploy the same to client locations.

In November 2009, we acquired Somerset Entertainment Ltd, now Mood Media Entertainment Ltd, following its name change in September 2011 ("Mood Entertainment"). Mood Entertainment is the leading North American producer and distributor of specialty music sold through non-traditional retailers using proprietary interactive displays.

In June 2010, we completed our acquisition of Mood Media Group S.A ("Mood Europe"). Prior to the acquisition, Mood Europe was privately held with its head office located in Luxembourg. It was built through a merger between three in-store media providers: Mood Media International, DMX Music International (DMX Music PTY Limited), and Alcas Holdings B.V. Our acquisition of Mood Europe was our largest acquisition at the time of the transaction.

In February 2011, we acquired Pelika Business Music, now Mood Media Finland Oy, following its name change in September 2011 (“Mood Finland”). Mood Finland, a privately-held company based predominantly in Finland, was one of Northern Europe’s largest digital music providers specializing in business environment background music. The acquisition of Mood Finland strengthened our position as an in-store digital media provider in Europe, especially in the hospitality sector due to the addition of bar and restaurant products to our portfolio.

In May 2011, we acquired Muzak Holdings LLC (“Muzak”), a leading provider of in-store audio and visual media in the United States. The total consideration of approximately \$341,500 (consisting of cash, convertible debentures, warrants, and additional cash earn-out consideration to be paid over three years following the closing of the acquisition in the event we achieve certain minimum EBITDA targets during such period) of which \$305,000 was used to repay loans due to former Muzak shareholders and debtholders. Muzak covers approximately 300,000 locations in the United States with 101 franchisees serving over 100,000 locations.

In September and October 2013, we implemented several changes to the senior management team, which included the appointment of Steve Richards as the President and Chief Executive Officer of Mood Media Corporation and Ken Eissing as the Chief Operating Officer for North America.

Recent Acquisitions

In March 2012, we acquired 100% of the issued and outstanding shares of DMX Holdings Inc. (“DMX”), a privately-held company that provides multi-sensory branding services to over 100,000 locations in the United States for total consideration of \$82,732 of which \$32,267 was used to repay loans due to former DMX debtholders. In connection with the closing of the DMX acquisition, we completed a private placement of 31,800,000 common shares at a subscription price of CAD\$3.60 per common share.

In May 2012, we acquired 100% of the issued and outstanding shares of the following private entities: Aplusk B.V., BIS Bedrijfs Informatie Systemen B.V., BIS Business Information Systems N.V., Avimotion Holding B.V. and BIS Elektrotechniek B.V. (collectively, “BIS”) for total consideration of approximately \$28,121. BIS, based primarily in the Netherlands, specializes in the design, installation, and supply of conference systems and digital signage solutions to private and public sector organizations in the Benelux region.

In October 2012, Muzak acquired the assets of Independent Communications Inc. (“ICI”) one of its largest franchisees for a cash consideration of \$29,116. Of the cash consideration 80% was payable on closing with the remaining 20% payable on the twelve month anniversary of closing, subject to certain post-closing purchase price adjustments. ICI offers a range of in-store audio, visual and scent solutions and operates in the U.S. mid-Atlantic region.

In December 2012, we acquired 100% of the issued and outstanding shares of the following private entities: Technomedia NY, LLC, Technomedia Solutions, LLC, ServiceNET Exp, LLC, Convergence, LLC, (collectively the Technomedia Group (“Technomedia”)) for a cash consideration of \$23,331. Technomedia are premier providers of the world’s most advanced media and technology innovations for multiple industries, including retail, hospitality, theme parks, performing arts, museums, special venue, education and others. Technomedia brings a total turn-key model to create compelling consumer destinations for a diverse range of customers, which include international fashion labels as well as leading entertainment and education clients globally. Technomedia is based in Orlando, Florida, and has offices located throughout the United States.

Discontinued Operation

During March 2012, we decided to dispose of Mood Entertainment since the retail point-of-purchase division no longer formed part of our core focus. On May 31, 2013, we completed the sale of substantially all the assets of Mood Entertainment for proceeds of approximately \$2,000. As part of the disposition, the Company is exiting any residual activities. The Company is currently finalising the costs of exit and the closing working capital accounts.

Rebranding

During the three months ended March 31, 2013 we officially launched a rebranding effort to better communicate our position as the global leader in experience design and integrate our portfolio companies — Muzak, DMX and Mood Media — into a single global brand, Mood. The rebranding will enable us to provide a more powerful, integrated suite of experiential marketing solutions that meet the needs of a diverse clientele.

Summary of Quarterly Results

The following table presents a summary of our unaudited operating results on a quarterly basis. The financial information is presented in accordance with International Financial Reporting Standards (“IFRS”). The quarterly results have been prepared to show the results for Mood Entertainment classified as a discontinued operation.

Period	Reclassified (Loss) income for the period attributable to owners of the parent				Basic and diluted EPS	
	Revenue Continuing operations	Continuing operations	Discontinued operations	Total	Continuing operations	Discontinued operations
Q3 - 2013 ⁷	\$125,662	\$(85,944)	\$(1,751)	\$(85,695)	(0.50)	(0.01)
Q2 - 2013 ⁶	126,268	(9,492)	(10,984)	(20,476)	(0.05)	(0.07)
Q1 - 2013	129,087	(5,086)	(3,752)	(8,838)	(0.03)	(0.02)
Q4 - 2012 ^{4,5}	131,946	(14,088)	(13,203)	(27,291)	(0.08)	(0.08)
Q3 - 2012 ³	119,951	(5,967)	(4,848)	(10,815)	(0.03)	(0.03)
Q2 - 2012 ^{1,2}	107,844	(7,170)	(23,763)	(30,933)	(0.04)	(0.14)
Q1 - 2012	84,082	1,790	(12,253)	(10,463)	0.01	(0.09)
Q4 - 2011	87,676	(7,582)	(23)	(7,605)	(0.06)	(0.00)

1. The significant increase in revenue is the result of the acquisition of DMX in March 2012.
2. The significant total loss for the period attributed to owners of the parent is as a result of impairment charges booked in respect of the discontinued operation.
3. The significant increase in revenue is the result of the BIS acquisition in May 2012.
4. The significant increase in revenue is primarily attributable to the acquisition of ICI in October 2012.
5. The significant loss for the period attributable to the owners of the parent, is the result of the costs associated with the raising of the unsecured notes and subsequent repayment of part of the credit facilities and restructuring and integration costs incurred in the period.
6. The significant loss for the period attributable to owners of the parent is due to the recognition of the loss on sale of the discontinued operation
7. The significant loss for the period attributable to owners of the parent is due to the impairment of goodwill in the period.

Operating Results

Three months ended September 30, 2013 compared with the three months ended September 30, 2012

Revenue from continuing operations

We report our continuing operations as one reportable segment, "In-Store Media."

Revenue for the three months ended September 30, 2013 and September 30, 2012 from continuing operations were as follows:

	Three months ended September 30, 2013	Three months ended September 30, 2012	% Change
In-Store Media	\$125,662	\$119,951	5%

Revenue is primarily derived from recurring monthly subscription fees for providing customized and tailored music, visual displays and messages through contracts ranging from 3-5 years. Revenue is also derived from equipment and installation fees. In-store media revenues increased by \$5,711 for the three months ended September 30, 2013 compared to the three months ended September 30, 2012, primarily as a result of the acquisition ICI in October 2012 and Technomedia in December 2012.

Cost of sales from continuing operations

Cost of sales were \$57,471 for the three months ended September 30, 2013, an increase of \$7,170, compared to \$50,301 for the three months ended September 30, 2012. The cost of sales as a percentage of revenue for the three months ended September 30, 2013 was 46%, compared with 42% for the three months ended September 30, 2012. The increase is due to the fact we generated a greater proportion of equipment revenues, primarily as a result of the acquisition of Technomedia in December 2012, which typically have a lower gross margin than our recurring revenues.

Operating expenses from continuing operations

Operating expenses were \$42,272 for the three months ended September 30, 2013, an increase of \$4,673, compared with \$37,599 for the three months ended September 30, 2012. The increase is primarily as a result of the acquisition of ICI in October 2012 and Technomedia in December 2012.

Depreciation and amortization from continuing operations

Depreciation and amortization was \$16,925 for the three months ended September 30, 2013; an increase of \$2,882, compared with \$14,043 for the three months ended September 30, 2012. The increase is primarily due to the addition of depreciation of the property and equipment acquired with, ICI and Technomedia and amortization of intangible assets that were recorded on acquisition.

Impairment to goodwill from continuing operations

Management has identified indicators for impairment at September 30, 2013. As a result the Company has recognized an impairment charge of \$75,000 in respect of Mood Europe during the three months ended September 30, 2013 based on management's cash flow projections, which incorporates key assumptions regarding discount rates and growth rates.

Share-based compensation from continuing operations

Share-based compensation expense was \$1,172 for the three months ended September 30, 2013; an increase of \$109 compared with \$1,063 for the three months ended September 30, 2012. The increase is due to accelerated share-based compensation expense in respect of previous senior management.

Other expenses from continuing operations

Other expenses were \$11,460 for the three months ended September 30, 2013 compared to \$8,047 for the three months ended September 30, 2012. Other expenses include \$2,802 of transaction expenses relating primarily to the Company's strategic and operational review. Other expenses also include \$8,658 of expenses relating to the continuing operational re-organization and improvements primarily in our North American business following the acquisition of DMX, ICI and Technomedia. This includes a \$3,500 settlement included in affiliate arrangements that were revised to resolve matters arising from integrating various acquired businesses.

Other expenses in 2012 related to transaction costs and restructuring costs incurred as a result of the integration of our North American business following the acquisitions of DMX in March 2012 and Muzak in May 2011.

Foreign exchange loss on financing transactions from continuing operations

Foreign exchange gain on financing transactions were \$6,634 for the three months ended September 30, 2013 compared with a gain of \$2,601 for the three months ended September 30, 2012. The gain was due to movements in foreign exchange rates.

Finance costs, net from continuing operations

Finance costs, net were a charge of \$13,866 for the three months ended September 30, 2013 compared with a charge of \$16,012 for the three months ended September 30, 2012. The decrease is driven by the changes in the fair value of financial instruments and contingent consideration, which are offset by the interest charge on the unsecured notes issued in October 2012.

Income tax from continuing operations

There was an income tax credit of \$16 for the three months ended September 30, 2013 compared to an income tax charge of \$1,295 for the three months ended September 30, 2012. The credit has arisen due to income tax payable on profits generated in the quarter, offset by a credit arising from an increase in deferred tax assets.

Loss after tax from discontinued operations

The loss after tax from discontinued operations was \$1,751 for the three months ended September 30, 2013 a decrease of \$3,097 compared to a loss of \$4,848 for the three months ended September 30, 2012. The higher loss during the three months ended September 30, 2012 was due to the impairment to property and equipment of \$4,000.

Nine months ended September 30, 2013 compared with the nine months ended September 30, 2012

Revenue from continuing operations

Revenue for the nine months ended September 30, 2013 and September 30, 2012 from continuing operations were as follows:

	Nine months ended September 30, 2013	Nine months ended September 30, 2012	% Change
In-Store Media	\$381,017	\$311,877	22%

Revenues increased by \$69,140 for the nine months ended September 30, 2013 compared to the nine months ended September 30, 2012, primarily as a result of the acquisitions of DMX in March 2012, BIS in May 2012, ICI in October 2012 and Technomedia in December 2012. Again, the most notable increase was within our equipment revenues.

Cost of sales from continuing operations

Cost of sales were \$170,634 for the nine months ended September 30, 2013, an increase of \$47,920, compared to \$122,714 for the nine months ended September 30, 2012. The cost of sales as a percentage of revenue for the nine months ended September 30, 2013 was 45%, compared with 39% for the nine months ended September 30, 2012. The increase is due to the fact we generated a greater proportion of equipment revenues, primarily as a result of the acquisitions of BIS in May 2012 and Technomedia in December 2012, which typically have a lower gross margin than our recurring revenues.

Operating expenses from continuing operations

Operating expenses were \$130,844 for the nine months ended September 30, 2013, an increase of \$25,364 compared with \$105,480 for the nine months ended September 30, 2012. The increase is primarily as a result of the acquisitions of DMX in March 2012, BIS in May 2012, ICI in October 2012 and Technomedia in December 2012.

Depreciation and amortization from continuing operations

Depreciation and amortization was \$51,145 for the nine months ended September 30, 2013; an increase of \$11,128, compared with \$40,017 for the nine months ended September 30, 2012. The increase is primarily due to the addition of depreciation of the property and equipment acquired with DMX, BIS, ICI and Technomedia and amortization of intangible assets that were recorded when they were acquired.

Impairment to goodwill from continuing operations

Management has identified indicators for impairment at September 30, 2013. As a result the Company has recognized an impairment charge of \$75,000 in respect of Mood Europe during the nine months ended September 30, 2013 based on management's cash flow projections, which incorporates key assumptions regarding discount rates and growth rates.

Share-based compensation from continuing operations

Share-based compensation expense was \$1,860 for the nine months ended September 30, 2013; a decrease of \$1,032 compared with \$2,892 for the nine months ended September 30, 2012. The decrease is due to forfeitures of unvested share options partly offset by new options that were granted in September 2012, November 2012 and December 2012.

Other expenses from continuing operations

Other expenses were \$25,270 for the nine months ended September 30, 2013 compared to \$24,368 for the nine months ended September 30, 2012. Other expenses include \$10,080 transaction expenses relating primarily to the Company's strategic and operational review. Other expenses also include \$15,190 of expenses relating to the continuing operational re-organization and improvements primarily in our North American business following the acquisition of DMX, ICI and Technomedia. Other expenses in 2012 related to transaction costs of entities purchased and restructuring costs incurred as a result of the integration of our North American business following the acquisitions of DMX in March 2012 and Muzak in May 2011.

Foreign exchange loss on financing transactions from continuing operations

Foreign exchange gain on financing transactions were \$4,777 for the nine months ended September 30, 2013 compared with a loss of \$2,767 for the nine months ended September 30, 2012. The gain was due to movements in foreign exchange rates.

Finance costs, net from continuing operations

Finance (income) costs, net were \$24,360 for the nine months ended September 30, 2013 compared with \$41,516 for the nine months ended September 30, 2012. The reduction is primarily the result of a change in fair value of the contingent consideration payable to the former owners of Muzak.

Income tax from continuing operations

There was an income tax charge of \$6,875 for the nine months ended September 30, 2013 compared to an income tax credit of \$16,657 for the nine months ended September 30, 2012. Included in the nine months ended September 30, 2012 is a deferred tax credit of \$16,200 relating to the recognition of previously unrecognised deferred tax assets. There was no corresponding credit in the current period.

Loss after tax from discontinued operations

The loss after tax from discontinued operations was \$16,487 for the nine months ended September 30, 2013 a decrease of \$24,377 compared to a loss of \$40,864 for the nine months ended September 30, 2012. The higher loss during the nine months ended September 30, 2012 was due to the impairment to goodwill of \$4,845, impairment to intangibles of \$16,871 and property and equipment of \$4,000.

Non-controlling interest from continuing operations

A credit of \$328, representing the element of profit of subsidiaries where the Company does not own 100% of the share capital, has been taken in the nine months ended September 30, 2013 compared to a credit of \$127 in the nine months ended September 30, 2012.

Total assets

Total assets were \$821,465 as at September 30, 2013 compared to \$949,781 as at December 31, 2012. The decrease of \$128,316 is largely due to an impairment of goodwill, amortisation of intangible assets and the sale of the assets relating to discontinued operation.

Non-current liabilities

Long term liabilities were \$640,466 as at September 30, 2013 compared to \$657,320 as at December 31, 2012. The decrease of \$16,854 is largely due to the change in fair value of the contingent consideration payable to the former owners of Muzak.

Liquidity and Capital Resources

Three months ended September 30, 2013, compared with the three months ended September 30, 2012

During the three months ended September 30, 2013, cash decreased by \$3,883.

Cash generated from operating activities for the three months ended September 30, 2013 was \$13,158 compared with \$3,062 in the three months ended September 30, 2012. The increase was driven by higher cash generated from working capital compared to the comparative period.

Cash used in investing activities for the three months ended September 30, 2013 was \$7,600 compared with \$7,665 in the three months ended September 30, 2012.

Cash used in financing activities for the three months ended September 30 2013 was \$9,441 compared to cash used of \$339 in the three months ended September 30, 2012. The higher interest payments during the three months ended September 30 2012 was associated with the previous first and second lien credit facilities prior to the issue of the unsecured notes in October 2012, which was offset by a drawdown of the revolving credit facilities in the comparative period. During the three months ended September 30, 2013 the Company purchased the remaining non-controlling interest in one of the DMX subsidiaries for \$4,000.

Nine months ended September 30, 2013, compared with the nine months ended September 30, 2012

During the nine months ended September 30, 2013, cash decreased by \$19,300

Cash generated from operating activities for the nine months ended September 30, 2013 was \$43,242 compared with \$7,026 for the nine months ended September 30, 2012. The increase in cash generated from operating activities was driven by an increase in cash generated from working capital compared to the comparative period.

Cash used in investing activities for the nine months ended September 30, 2013 was \$25,787 compared with \$99,180 for the nine months ended September 30, 2012. The decrease was attributable to the cash used to fund the acquisitions of DMX in March 2012 and BIS in May 2012.

Cash used in financing activities for the nine months ended September 30, 2013 was \$36,755 compared to cash generated of \$89,508 for the nine months ended September 30, 2012. The nine months ended September 30, 2012 included proceeds generated from private placements in connection with the DMX and BIS acquisitions although this was partially offset by repayment of loans to former DMX debt holders in the same period.

As at September 30, 2013, the Company had cash of \$27,673 and undrawn lines of credit of \$21,300. Management believes that the Company has sufficient liquidity as a result of having strong cash reserves and the ability to draw down on revolving credit facilities to meet its working capital and capital expenditure needs.

Contractual obligations

The following chart outlines the Company's contractual obligations as at September 30, 2013:

Description	Total	Less than one year	One to three years	Four to five years	Beyond five years
Credit facility	\$208,430	\$2,132	\$4,264	\$202,034	\$-
Credit facility interest	66,533	14,736	29,058	22,739	-
Senior unsecured notes	350,000	-	-	-	350,000
Senior unsecured notes interest	242,813	32,375	64,750	64,750	80,938
Convertible debentures	50,266	-	50,266	-	-
Convertible debenture interest	12,762	5,096	7,666	-	-
Operating leases	57,542	16,517	25,276	11,640	4,109
Finance leases	1,985	1,159	826	-	-
Deferred consideration	5,600	5,600	-	-	-
Trade and other payables	116,160	116,160	-	-	-
Total	\$1,112,091	\$193,775	\$182,106	\$301,163	\$435,047

The consideration for the acquisition of ICI contains deferred consideration of \$5,600, to be paid in October 2013.

Bank debt

In connection with the acquisition of Muzak on May 6 2011, we entered into credit facilities with Credit Suisse AG ("Credit Suisse"), as agent, consisting of a \$20,000 5-year revolving credit facility (the "First Lien Revolving Credit Facility"), a \$355,000 7-year first lien term loan (the "First Lien Term Facility" and together with the First Lien Revolving Credit Facility, the "First Lien Facilities") and a \$100,000 7.5-year second lien term loan (the "Second Lien Facility", and together with the First Lien Facilities, the "Credit Facilities"). The First Lien Revolving Credit Facility matures on May 6, 2016, the First Lien Term Facility matures on May 6, 2018 and the Second Lien Facility matured on November 6, 2018.

On October 19, 2012, we closed an offering of \$350,000 aggregate principal amount of senior unsecured notes (the "Notes") by way of private placement. The Notes are due October 15, 2020 and bear interest at an annual rate of 9.25%. We used the net proceeds of the Notes to repay \$140,000 of the first lien term facility and the second lien facility in its entirety.

In connection with the Notes, amendments were made to the Company's existing First Lien Credit Facility. The First Lien Credit Facility was amended to, among other things: (a) permit the incurrence of the debt represented by the Notes; (b) revise the financial maintenance covenants contained therein, including, removing the maximum total leverage ratio financial maintenance covenant, adding a maximum senior secured leverage ratio financial maintenance covenant, reducing the minimum interest coverage ratio financial maintenance covenant and providing for customary equity cure rights related to financial maintenance compliance; and (c) increase the size of our First Lien Revolving Credit Facility from \$20,000 to \$25,000.

Following the repayments to the credit facilities the first lien term loan is repayable at \$533 a quarter, with the remainder repayable on maturity. Interest on the first lien loan accrues at a rate of adjusted LIBOR plus 5.50% per annum or the alternate base rate plus 4.50% per annum, as applicable.

Convertible debentures

On October 1, 2010, we issued convertible unsecured subordinated debentures (the “New Debentures”) with a principal amount of \$31,690. As part of the transaction, we also issued an additional \$1,078 in New Debentures, for a total of \$32,768 aggregate principal amount of New Debentures, as partial payment of the underwriter’s fee. The New Debentures have a maturity date of October 31, 2015 and bear interest at a rate of 10% per annum, payable semi-annually. They are convertible at any time at the option of the holders into common shares at an initial conversion price of \$2.43 per common share. \$646 of New Debentures were converted during 2011, resulting in the issuance of 265,843 common shares. There are a maximum of 13,218,930 of our common shares issuable upon conversion of the remaining New Debentures.

On May 6, 2011, we issued convertible unsecured subordinated debentures (the “Consideration Debentures”) with a principal amount of \$5,000 as part of the consideration for the Muzak acquisition. The Consideration Debentures have a maturity date of October 31, 2015 and bear interest at a rate of 10% per annum, payable semi-annually. They are convertible at any time at the option of the holders into common shares at an initial conversion price of \$2.43 per common share. Consideration debentures with a carrying value of \$364 were converted during 2012, resulting in the issue of 146,500 common shares. There are a maximum of 1,911,111 of our common shares issuable upon conversion of the remaining Consideration Debentures.

On May 27, 2011, we completed a private placement of convertible unsecured subordinated debentures (the “Convertible Debentures”) with a principal amount of \$13,500. The Convertible Debentures were issued for a subscription price of \$0.9875 per \$1 principal amount, resulting in gross proceeds of \$13,331. The Convertible Debentures have a maturity date of October 31, 2015 and bear interest at a rate of 10% per annum, payable semi-annually. They are convertible at any time at the option of the holders into common shares at an initial conversion price of \$2.80 per common share. There are a maximum of 4,761,071 of our common shares issuable upon conversion of the New Debentures.

Trade and other payables

Trade and other payables arise in the normal course of business and are to be settled within one year of the end of the reporting period.

Lease commitments

Operating leases and finance leases are entered into primarily for the rental of premises and vehicles used for business activities.

Capitalization

As at September 30, 2013 our capital structure included shareholders’ equity in the amount of \$34,728. Our outstanding debt as at that date included convertible debentures of \$46,126, bank debt of \$198,932 and unsecured notes of \$344,909. As at December 31, 2012 our capital structure included shareholders’ equity in the amount of \$153,256. Our outstanding debt as at that date included convertible debentures of \$44,949, bank debt of \$198,965 and unsecured notes of \$344,401.

The number of our outstanding common shares at September 30, 2013 was 171,639,563. There have been no changes in the number of issued shares since December 31, 2012. The following table provides additional share information (in thousands of shares) on a fully diluted basis:

	Outstanding as at November 13, 2013	Outstanding as at September 30, 2013
Common shares	171,640	171,640
Share options	17,481	17,128
Warrants	4,408	4,408
Convertible debentures	19,891	19,891

Risk management

We are exposed to a variety of financial risks including market risk (including foreign exchange and interest rate risks), liquidity risk and credit risk. Our overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Foreign currency exchange risk

We operate in the US, Canada and internationally. The functional currency of the Company is US dollars. Foreign currency exchange risk arises because the amount of the local currency income, expenses, cash flows, receivables and payables for transactions denominated in foreign currencies may vary due to changes in exchange rates ("transaction exposures") and because the non-US denominated financial statements of our subsidiaries may vary on consolidation into US dollars ("translation exposures").

The most significant translation exposure arises from the Euro currency. We are required to revalue the Euro denominated net assets of the European subsidiaries at the end of each period with the foreign currency translation gain or loss recorded in other comprehensive income. We do not currently hedge translation exposures. Since the financial statements of Muzak, DMX, ICI and Technomedia are denominated in US dollars, the impact associated with translation exposure has been reduced following these acquisitions.

Interest rate risk

Our interest rate risk arises on a debt drawn under the Credit Facilities, which bear interest at a floating rate. However the level of interest rate risk is mitigated by the fact that the Credit Facilities carry an interest rate floor which currently exceeds LIBOR. The interest rate floor is treated for accounting purposes as a non-cash liability which is disclosed within other financial liabilities in the consolidated statement of financial position. We also purchased an interest rate cap in 2011 to protect against increasing LIBOR rates and this asset is recorded within other financial assets in the consolidated statement of financial position. The fair value of these instruments is determined by reference to mark to market valuations performed by financial institutions at each reporting date and any changes in fair value are recorded within finance costs within the consolidated statements of income. The total change in fair value for the nine months ended September 30, 2013 was a gain of \$3,005.

Liquidity risk

Liquidity risk arises through excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. We achieve this by maintaining sufficient cash and through the availability of funding from the committed Credit Facilities.

Credit risk

Credit risk arises from cash held with banks and credit exposure to customers on outstanding accounts receivable balances. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. We assess the credit quality of the counterparties, taking into account their financial position, past experience and other factors. Management also monitors payment performance and the utilization of credit limits of customers.

Critical Accounting Estimates

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. We based our assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond our control. Such changes are reflected in the assumptions when they occur.

Share-based compensation

We measure the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based compensation transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based compensation transactions are disclosed in note 22 of the Company's annual financial statements.

Fair value measurement of contingent consideration

Contingent consideration, resulting from business combinations, is valued at fair value at the acquisition date as part of the business combination. When the contingent consideration meets the definition of a derivative and, thus, a financial liability, it is subsequently remeasured to fair value at each reporting date. The determination of the fair value is based on probability of expected outcomes and discounted cash flows. The key assumptions take into consideration the probability of meeting each performance target and the discount factor.

Fair value of financial instruments

When the fair value of financial assets and financial liabilities recorded in the consolidated statements of financial position cannot be derived from active markets, their fair value is determined using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include consideration of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Income taxes

Tax regulations and legislation and the interpretations thereof in the various jurisdictions in which we operate are subject to change. As such, income taxes are subject to measurement uncertainty. Deferred tax assets are recognized to the extent that it is probable that the deductible temporary differences will be recoverable in future periods. The recoverability assessment involves a significant amount of estimation including: an evaluation of when the temporary differences will reverse, an analysis of the amount of future taxable earnings, the availability of cash flow to offset the tax assets when the reversal occurs and the application of tax laws. To the extent that the assumptions used in the recoverability assessment change, there may be a significant impact on the consolidated financial statements of future periods.

Contingencies

Contingencies, by their nature, are subject to measurement uncertainty as the financial impact will only be confirmed by the outcome of a future event. The assessment of contingencies involves a significant amount of judgment including assessing whether a present obligation exists and providing a reliable estimate of the amount of cash outflow required in settling the obligation. The uncertainty involved with the timing and amount at which a contingency will be settled may have a material impact on the consolidated financial statements of future periods to the extent that the amount provided for differs from the actual outcome.

Inventory obsolescence

Our obsolescence provision is determined at each reporting period and the changes are recorded in the consolidated statements of income (loss). This calculation requires the use of estimates and forecasts of future sales. Qualitative factors, including market presence and trends, strength of customer relationships, as well as other factors, are considered when making assumptions with regard to recoverability. A change in any of the significant assumptions or estimates used could result in a material change to the provision.

Property and equipment

We have estimated the useful lives of the components of all property and equipment based on past experience and industry norms and we depreciate these assets over their estimated useful lives. We assess these estimates on a periodic basis and makes adjustments when appropriate. Rental equipment installed at customer premises includes costs directly attributable to the installation process. Judgment is required in determining which costs are considered directly attributable to the installation process and the percentage capitalized is estimated based on work order hours for the year.

Impairment of long-lived assets

Long-lived assets primarily include property and equipment and intangible assets. An impairment loss is recognized when the carrying value of the cash-generating unit ("CGU"), which is defined as a unit that has independent cash inflows, to which the asset relates, exceeds the CGU's fair value, which is determined using a discounted cash flow method. We test the recoverability of its long-lived assets when events or circumstances indicate that the carrying values may not be recoverable. While we believe that no provision for impairment is required, we must make certain estimates regarding profit projections that include assumptions about growth rates and other future events. Changes in certain assumptions could result in charging future results with an impairment loss.

Leases

The determination of whether an arrangement with a customer is, or contains, a lease is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

Goodwill and indefinite-lived intangible assets

We perform asset impairment assessments for indefinite-lived intangible assets and goodwill on an annual basis or on a more frequent basis when circumstances indicate impairment may have occurred. Under IFRS, we selected October 1 as the date when to perform the annual impairment analysis. Impairment calculations under IFRS are done at a CGU group level. Calculations use a discounted cash flow method under a one-step approach and consider the relationship between the Company's market capitalization and its book value. Goodwill is allocated and tested in conjunction with its related CGU or group of CGUs that benefit from collective synergies. The assessments used to test for impairment are based on discounted cash flow projections that include assumptions about growth rates and other future events. Industry information is used to estimate appropriate discount rates used in the calculation of discounted cash flows.

Disclosure Controls and Internal Controls over Financial Reporting

The Company did not make any changes to the Company's internal controls over financial reporting during the most recent reporting period that would have materially affected or would reasonably be likely to materially affect the Company's internal controls over financial reporting.

As the scope of design of internal controls over financial reporting and disclosure controls and procedures has been limited to exclude controls, policies and procedures of Technomedia, which was acquired in December 2012, certain financial information with respect to Technomedia is set out below to indicate the impact of the acquisition on the consolidated financial statements of the Company.

Summary financial information regarding Technomedia for the three and nine months ended September 30, 2013.

Statement of operations:	Three months ended September 30, 2013	Nine months ended September 30, 2013
Revenue	\$8,237	\$29,028
Net Income	431	3,193

Financial Position:	As at September 30, 2013
Current assets	\$13,181
Total assets	31,807
Current liabilities	6,012
Total liabilities	6,012

Risk Factors

The results of operations, business prospects and the financial condition of the Company are subject to a number of risks and uncertainties, and are affected by a number of factors outside the control of the Company's management. These risks are noted below.

Integration risks

Making strategic acquisitions and business combinations is a significant part of our growth. Its ability to expand in this manner depends in large part on its ability to identify suitable acquisition targets and compete successfully with other entities for these targets. We recently completed the acquisition of Technomedia in December 2012, ICI in October 2012, BIS in May 2012, DMX in March 2012, and Muzak in May 2011, with the expectation that these acquisitions would result in strategic benefits, economies of scale and synergies. These anticipated benefits, economies of scale and synergies will depend in part on whether the operations of Mood Media, Technomedia, ICI, BIS, DMX and Muzak can be integrated in an efficient and effective manner. It is possible that this may not occur as planned, or that the financial and other benefits may be less than anticipated. In addition, management believes that the integration will give rise to restructuring costs and charges, and these may be greater than currently anticipated. Furthermore, the contracts governing the Company's recent acquisitions do include, and the contracts governing the Company's future business combinations and/or acquisitions may include, post-closing purchase price adjustments that require it to make additional payments to the relevant selling party post-closing and such payments could be greater than anticipated.

We have been built via a series of acquisitions. Failure to properly integrate these acquisitions will leave the Company less able to operate as a consolidated whole and may lead to depressed revenue and margin performance. This integration is ongoing and requires dedication and substantial management effort, time and resources which may divert management's focus and resources from other strategic opportunities and from operational matters during this process. The integration process may result in loss of key employees and the disruption of the ongoing business, customer and employee relationships that may adversely affect our ability to achieve the anticipated benefits of the acquisitions. Further, the operating results and financial condition of the Company could be materially adversely impacted by the focus on integration.

Future business combinations and/or acquisitions could materially and adversely affect our business, financial condition and results of operations if it is unable to integrate the operations of the acquired companies. Completing business combinations and/or acquisitions could require use of a significant amount of our available cash. Furthermore, the Company may have to issue equity or equity linked securities to pay for future business combinations and/or acquisitions. Acquisitions and investments may also have negative effects on our reported results of operations due to acquisition-related charges, amortization of acquired technology and other intangibles, failure to retain key employees or customers of acquired companies and/or actual or potential liabilities, known and unknown, associated with the acquired businesses or joint ventures. Any of these acquisition-related risks or costs could materially and adversely affect the Company's business, financial condition and results of operations.

Costly and protracted litigation may be necessary to defend usage of intellectual property

The Company may become subject to legal proceedings and claims in relation to its business. In particular, while management believes that it has the rights to distribute the music recordings used in connection with our business, we may be subject to copyright infringement lawsuits for selling, performing or distributing music recordings if it does not have the rights to do so. Results of legal proceedings cannot be predicted with certainty. Regardless of their merits, litigation, arbitration and/or mediation of such claims may be both time-consuming and disruptive to our operations and cause significant expense and diversion of management attention. The Company is currently defending itself against a number of legal claims. While we believes these claims to be without merit, and is vigorously defending itself, the Company cannot guarantee that it will be successful or that it will reach commercially reasonable settlement terms. Should we fail to prevail in such proceedings and claims, its financial condition and operating results could be materially and adversely affected.

If the current owners with which the Company contracts do not have legal title to the digital rights they grant the Company, the Company's business may be adversely affected

The Company's acquisition and distribution agreements with content owners contain representations, warranties and indemnities with respect to the digital rights granted to us. If we were to acquire and make available for purchase music recordings from a person who did not actually own such rights and we were unable to enforce on the representations, warranties and indemnities made by such person, our business may be adversely affected.

The Company faces intense competition from our competitors that could negatively affect our results of operations

The market for acquiring exclusive digital rights from content owners is competitive, especially for the distribution of music catalogues owned by independent labels. The number of commercialized music recordings available for acquisition is large, but limited, and many of the more desirable music recordings are already subject to digital distribution agreements or have been directly placed with digital entertainment services. We face competition in our pursuit to acquire additional content, which may reduce the amount of music content that it is able to acquire or license and may lead to higher acquisition prices. Our competitors may from time to time offer better terms of acquisition to content owners. Increased competition for the acquisition of digital rights to music recordings may result in a reduction in operating margins and may reduce our ability to distinguish itself from its competitors by virtue of its music library.

The Company has different competitors in its local geographies but very few that operate across international markets. Some of these local competitors offer services at a lower price than we offer in order to promote their services and gain share. If these competitors are able to leverage such price advantages, it could harm our ability to compete effectively in the marketplace. Furthermore, there is a threat of new entrants to the competitive landscape, including traditional advertisers and media providers as well as start-up companies. The growth of social media could facilitate other forms of new entry that will compete with the Company.

We also compete with companies that are not principally focused on providing business music services. Such competitors include Sirius XM Satellite Radio, webcasters and traditional radio broadcasters that encourage workplace listening, video services that provide business establishments with music videos or television programming, and performing rights societies that license business establishments to play sources such as CDs, tapes, MP3 files and satellite, terrestrial and internet radio.

We compete on the basis of service, the quality and variety of its music programs, the availability of its non-music services and, to a lesser extent, price. Management believes that the Company can compete effectively due to the breadth of its in-store media. While managements believes that the Company competes effectively, the Company's competitors have established client bases and are continually seeking new ways to expand such client bases and revenue streams. As a result, competition may negatively impact the Company's ability to attract new clients and retain existing clients.

If the Company is unable to generate demand for managed media services, its financial results may suffer

The Company's current business plan contemplates deriving revenue from businesses that want a professional media service that is available for sale in-store or broadcast in-store. The Company's ability to generate such revenues depends on the market demand for its media content and its ability to provide a robust service that delivers a return on investment.

Our customers may choose to terminate their relationship with us or reduce their spending on our services, which could have a material adverse effect on its financial condition and results of operations. We depend on a large portion of our revenues being derived from the continued spending by its clients on in-store media services. Our top clients for such services typically have lengthy tenures. However, should clients decide to stop using or to reduce their expenditures on in-store media or decide to terminate their agreements with us and to use one of our competitors; we would lose subscription income which will have an adverse effect on our financial position.

The Company's success will depend, in part, on its ability to develop and sell new products and services

Our success depends in part on the ability of its personnel to develop leading-edge media products and services and the ability to cross sell visual media and scent marketing to existing clients. Our business and operating results will be harmed if it fails to cross sell its services and/or fails to develop products and services that achieve widespread market acceptance or that fails to generate significant revenues or gross profits to offset development and operating costs. We may not successfully identify, develop and market new products and service opportunities in a timely manner. We also may not be able to add new content as quickly or as efficiently as its competitors, or at all. If we introduce new products and services, they may not attain broad market acceptance or contribute meaningfully to its revenues or profitability. Competitive or technological developments may require us to make substantial, unanticipated investments in new products and technologies, and we may not have sufficient resources to make these investments.

The Company's use of open source and third party software could impose unanticipated conditions or restrictions on its ability to commercialize its solutions

While we have developed our own proprietary software and hardware for the delivery of its media solutions, we may be restricted under existing or future agreements from utilizing certain licensed technology in all of the jurisdictions and/or industry sectors in which it operates. Failure to comply with such restrictions may leave us open to proceedings by third parties and such restrictions may, if alternative technology is not available, affect our ability to deliver its services in such jurisdictions, in each case resulting in an adverse effect on our financial position.

The Company's suppliers may choose to terminate their relationship with the Company, which could have a material adverse effect on the Company's financial condition and results of operations

We have licensing arrangements with suppliers of satellite services which are used in the delivery of content to its customers. If such licensing arrangements were terminated and alternative arrangements were not available, this would affect our ability to deliver its services resulting in an adverse effect on its financial or trading position.

The imposition of the obligation to collect sales or other taxes on shipments into one or more states in the United States could create administrative burdens on the Company and decrease its future sales

We do not collect sales or other taxes on shipments by its foreign subsidiaries of most of its goods into most states in the United States. One or more states or foreign countries may seek to impose sales or other tax collection obligations on out-of-jurisdiction e-commerce companies. A successful assertion by one or more states or foreign countries that the Company should collect sales or other taxes on the sale of merchandise or services could result in substantial tax liabilities for past sales, decrease our ability to compete with traditional retailers, and otherwise harm its business.

Currently, U.S. Supreme Court decisions restrict the imposition of obligations to collect state and local sales and use taxes with respect to sales made over the internet. However, a number of states, as well as the U.S. Congress, have been considering initiatives that could limit or supersede the Supreme Court's position regarding sales and use taxes on internet sales. If any of these initiatives were successful, we could be required to collect sales and use taxes in additional states. The imposition by state and local governments of various taxes upon internet commerce could create administrative burdens for us, put it at a competitive disadvantage if they do not impose similar obligations on all of its online competitors and decrease its future sales.

The Company is taxable on its worldwide income both in Canada and the United States, which could, in certain circumstances, have a material adverse effect on the Company

The Company is a resident in Canada for purposes of the Income Tax Act (Canada) and management believes that it will continue to be treated as a domestic corporation in the United States under the U.S. Internal Revenue Code 1986, as amended. As a result, Mood Media (but not its subsidiaries) is generally taxable on its worldwide income in both Canada and the United States (subject to the availability of any tax credits and deductions in either or both jurisdictions in respect of foreign taxes paid by Mood Media). Management believes that the Company's status of being taxable both in Canada and the United States has not given rise to any material adverse consequences as of the date hereof. Management also believes that such status is not likely to give rise to any material adverse consequences in the future as it is not anticipated that it will have any material amounts of taxable income. Nevertheless, the Company's status of being taxable on its worldwide income both in Canada and the United States could, in certain circumstances, have a material adverse effect on the Company.

As result of the Company being resident in both Canada and the United States, withholding taxes of both Canada and the United States will be relevant to holders of the notes and could, in certain circumstances, result in double taxation to certain investors and other consequences.

If the Company is unable to access additional equity or debt financing at a reasonable cost, it could affect our ability to grow

With the deterioration of capital markets worldwide, there is an increased risk that we may not be able to obtain additional equity or debt financing that it may require to consummate future acquisitions or to refinance its debt when it is due. While management believes that the Company possesses sufficient cash resources to execute the Company's business plan, an inability to access financing at a reasonable cost could affect its ability to grow.

Failure to continue to generate sufficient cash revenues could materially adversely affect Mood Media's business

The Company's ability to be profitable and to have positive cash flow is dependent upon its ability to maintain and locate new customers who will purchase its products and use its services, and our ability to continue to generate sufficient cash revenues. We presently generate the majority of its revenue in the United States and Europe, with customers concentrated in the retail and hospitality sectors. These sectors continue to be negatively affected by ongoing economic difficulties and our revenues could be affected by bankruptcies or rationalization of a portion of its existing client base. A material reduction in revenue would negatively impact our financial position.

If our revenue grows more slowly than anticipated, or if our operating expenses are higher than expected, it may not be able to sustain or increase profitability, in which case its financial condition will suffer and its value could decline. Failure to continue to generate sufficient cash revenues could also cause the Company to go out of business.

The Company may not have the financial or technological resources to adapt to changes in available technology and its clients' preferences, which may have a negative effect on the Company's revenue

Our product and service offerings compete in a market characterized by rapidly changing technologies, frequent innovations and evolving industry standards. There are numerous methods by which existing and future competitors can deliver programming, including various forms of recorded media, direct broadcast satellite services, wireless cable, fibre optic cable, digital compression over existing telephone lines, advanced television broadcast channels, digital audio radio service and the internet. Competitors may use different forms of delivery for the services that we offer, and clients may prefer these alternative delivery methods. We may not have the financial or technological resources to adapt to changes in available technology and our clients' preferences, which may have a negative effect on its revenue.

We cannot provide assurance that it will be able to use, or compete effectively with competitors that adopt, new delivery methods and technologies, or keep pace with discoveries or improvements in the communications, media and entertainment industries. We also cannot provide assurance that the technology it currently relies upon will not become obsolete.

The Company pays royalties to license music rights and may be adversely affected if such royalties are increased

We pay performance royalties to songwriters and publishers through contracts negotiated with performing rights societies such as The American Society of Composers Authors and Publishers ("ASCAP") and Broadcast Music, Inc., and publishing or mechanical royalties to publishers and collectives that represent their interests, such as The Harry Fox Agency—a collective that represents publishers and collects royalties on their behalf.

If mechanical royalty rates for digital music are increased, there can be no assurance that the Company will be able to pass through such increased rates to its customers. As a result, our results of operations and financial condition may be adversely affected.

We also secure rights to music directly from songwriters. There is no assurance that it will be able to secure such rights, licenses and content in the future on commercially reasonable terms, if at all. Limitations on the availability of certain musical works may result in the discontinuance of certain programs, and as a result, may lead to increased client churn.

The Company depends upon suppliers for the manufacture of its proprietary media players, and the termination of its arrangements with these suppliers could materially affect its business

We rely on suppliers to manufacture its proprietary media players. In the event these agreements are terminated, management believes that we will be able to find alternative suppliers. If it is unable to obtain alternative suppliers on a timely basis, or at all, or if it experiences significant delays in shipment, we may be forced to suspend or cancel delivery of products and services to new accounts which may have a material adverse effect upon its business. If we are unable to obtain an adequate supply of components meeting its standards of reliability, accuracy and performance, the Company would be materially and adversely affected.

Possible infringement by third parties of intellectual property rights could have a material adverse effect on the Company's business, financial condition and results of operations

We distribute digital music content to its business music consumers via its proprietary media players. We cannot be certain that the steps it has taken to protect its intellectual property rights will be adequate or that third parties will not infringe or misappropriate its proprietary rights. To protect its proprietary rights, we depend on a combination of patent, trademark, copyright and trade secret laws, confidentiality agreements with its employees and third parties and protective contractual provisions. These efforts to protect its intellectual property rights may not be effective in preventing misappropriation of its technology. These efforts also may not prevent the development and design by others of products or technologies similar to, competitive with or superior to those developed by the Company. Any of these results could reduce the value of the Company's intellectual property. In addition, any infringement or misappropriation by third parties could have a material adverse effect on our business, financial condition and results of operations.

The Company may be liable if third parties misappropriate its users' and customers' personal information

Third parties may be able to hack into or otherwise compromise our network security or otherwise misappropriate its users' personal information or credit card information. If our network security is compromised, we could be subject to liability arising from claims related to, among other things, unauthorized purchases with credit card information, impersonation or other similar fraud claims or other misuse of personal information, such as claims for unauthorized marketing purposes. In such circumstances, we also could be liable for failing to provide timely notice of a data security breach affecting certain types of personal information in accordance with the growing number of notification statutes. Consumer protection privacy regulations could impair our ability to obtain information about its users, which could result in decreased advertising revenues.

Our network also uses "cookies" to track user behavior and preferences. A cookie is information keyed to a specific server, file pathway or directory location that is stored on a user's hard drive or browser, possibly without the user's knowledge, but is generally removable by the user. We use information gathered from cookies to tailor content to users of its network and such information may also be provided to advertisers on an aggregate basis. In addition, advertisers may themselves use cookies to track user behavior and preferences. A number of internet commentators, advocates and governmental bodies in the United States and other countries have urged the passage of laws directly or indirectly limiting or abolishing the use of cookies. Other tracking technologies, such as so-called "pixel tags" or "clear GIFs", are also coming under increasing scrutiny by legislators, regulators and consumers, imposing liability risks on our business. In addition, legal restrictions on cookies, pixel tags and other tracking technologies may make it more difficult for us to tailor content to its users, making our network less attractive to users. Similarly, the unavailability of cookies, pixel tags and other tracking technologies may restrict the use of targeted advertising, making our network less attractive to advertisers and causing it to lose significant advertising revenues.

Government regulation of the internet and e-commerce is evolving and unfavourable changes could harm our business

We are subject to general business regulations and laws, as well as regulations and laws specifically governing the internet and e-commerce. Existing and future laws and regulations may impede the growth of the internet or online services. These regulations and laws may cover taxation, privacy, data protection, pricing, content, copyrights, distribution, electronic contracts and other communications, consumer protection, and the characteristics and quality of products and services. It is not clear how existing laws governing issues such as property ownership, libel, and personal privacy apply to the internet and e-commerce. Unfavourable regulations and laws could diminish the demand for our products and services and increase its cost of doing business.

The locations of the Company's users expose it to foreign privacy and data security laws and may increase the Company's liability, subject it to non-uniform standards and require it to modify its practices

Our users are located in the United States and around the world. As a result, the Company collects and processes the personal data of individuals who live in many different countries. Privacy regulators in certain of those countries have publicly stated that foreign entities (including entities based in the United States) may render themselves subject to those countries' privacy laws and the jurisdiction of such regulators by collecting or processing the personal data of those countries' residents, even if such entities have no physical or legal presence there. Consequently, we may be obligated to comply with the privacy and data security laws of certain foreign countries.

Our exposure to Canadian, European and other foreign countries' privacy and data security laws impacts its ability to collect and use personal data, and increases its legal compliance costs and may expose the Company to liability. As such laws proliferate, there may be uncertainty regarding their application or interpretation, which consequently increases our potential liability. Even if a claim of non-compliance against the Company does not ultimately result in liability, investigating or responding to a claim may present a significant cost. Future legislation may also require changes in our data collection practices which may be expensive to implement.

In addition, enforcement of legislation prohibiting unsolicited e-mail marketing in the European Union without prior explicit consent is increasing in several European countries, including France, Germany and Italy, which activities could negatively affect the Company's business in Europe and create further costs for it.

Evolving industry

We sell digital music at prices which are based, to a large extent, on the price third party digital music retailers charge to consumers. The Company has limited ability to influence the pricing models of the digital entertainment services. While the major record labels were unsuccessful in their recent attempt to change the pricing structure, there is no assurance that they will not attempt to change the pricing structure in the future or that the digital music retailers will not initiate such a change that could result in lower pricing or tiered pricing that could reduce the amount of revenue we receive. In addition, the popularity of digital music retailers that offer digital music through subscription and other pricing models is increasing. The revenue we earn per individual music recording is generally less under these models than what it receives through sales of music outside of a subscription service. Additionally, digital music services at present generally accept all the music content that the Company and other distributors deliver to them. However, if the digital music services in the future decide to limit the types or amount of music recordings they will accept from content owners and distributors like the Company, or limit the number of music recordings they will post for sale, or change their current stocking plans, for instance by removing music recordings that do not meet minimum sales thresholds or other criteria, our revenue may be reduced.

Piracy is likely to continue to negatively impact the potential revenue of the Company

A portion of our revenue comes from the sale of its digital content over the Internet and wireless, cable and mobile networks, which is subject to unauthorized consumer copying and widespread dissemination without an economic return to the Company. Global piracy is a significant threat to the entertainment industry generally and to the Company. Unauthorized copies and piracy have contributed to the decrease in the volume of legitimate sales of music and video content and have put pressure on the price of legitimate sales. This may result in a reduction in the our revenue.

The Company does not expect to pay dividends and there are potential adverse tax consequences from the payment of dividends on the Common Shares

The Company has not paid any cash dividends with respect to its Common Shares, and it is unlikely that we will pay any dividends on the Common Shares in the foreseeable future. However, dividends received by shareholders could be subject to applicable withholding taxes and the Company recommends that such shareholders seek the appropriate professional advice in this regard.

Litigation

We are currently defending itself against a number of legal claims. While we believe these claims to be without merit, and is vigorously defending ourselves, we cannot guarantee that it will be successful or that it will reach commercially reasonable settlement terms. A negative judgment or the costs of a protracted defense could materially affect the Company's earnings.

Reliance on debt facilities

A portion of our credit facilities bear interest at floating interest rates and, therefore, are subject to fluctuations in interest rates. Interest rate fluctuations are beyond our control and there can be no assurance that interest rates will not have a material adverse effect on the Company's financial performance. We are partly financed through debt and owe money to creditors including banks and holders of convertible debentures. Such debt is secured against the Company's assets and is subject to certain covenants being met. Should we fail to meet our covenants and should its creditors demand repayment, we will need to find new sources of finance or else cede ownership of some its assets which may have a material adverse effect on the business of the Company.

Foreign currency exchange risk

We operates in the US, Canada and internationally. The functional currency of the Company is US dollars and a significant number of our transactions are recorded in Canadian dollars and Euros. Foreign currency exchange risk arises because the amount of the local currency income, expenses, cash flows, receivables and payables for transactions denominated in foreign currencies may vary due to changes in exchange rates ("transaction exposures") and because the non-US denominated financial statements of the Company's subsidiaries may vary on consolidation into US dollars ("translation exposures").

The most significant translation exposure arises from the Euro currency. We are required to revalue the Euro denominated net assets of the European subsidiaries at the end of each period with the foreign currency translation gain or loss recorded in other comprehensive income. The Company does not currently hedge translation exposures. Since the financial statements of Muzak and DMX are denominated in US dollars, the risk associated with translation exposures has reduced following the acquisition of Muzak and DMX.

The most significant transaction exposure arises as a result of a significant level of US dollar transactions occurring within the Canadian operations.

Interest rate risk

Our interest rate risk arises on a debt drawn under the Credit Facilities, which bear interest at a floating rate. However the level of interest rate risk is mitigated by the fact that the Credit Facilities carry an interest rate floor which currently exceeds LIBOR. We also purchased an interest rate cap in 2011 to protect against increasing LIBOR rates.

Liquidity risk

Liquidity risk arises through excess of financial obligations over available financial assets due at any point in time. Our objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. We achieve this by maintaining sufficient cash and through the availability of funding from the committed Credit Facilities.

Credit risk

Credit risk arises from cash held with banks and credit exposure to customers on outstanding accounts receivable balances. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. We assess the credit quality of the counterparties, taking into account their financial position, past experience and other factors. Management also monitors payment performance and the utilization of credit limits of customers.

Further detail is provided in the "Risk Factors" section of the Company's AIF, which can be found at www.sedar.com.

Forward-Looking Statements

Certain statements in this management's discussion and analysis contains "forward-looking" statements that involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. When used in this management's discussion and analysis, such statements use such words as "may," "will," "intend," "should," "expect," "expect to," "believe," "plan," "anticipate," "estimate," "predict," "potential," "continue," the negative of these terms or other similar terminology. These statements reflect current expectations regarding future events and operating performance and speak only as of the date of this management's discussion and analysis. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements, including, but not limited to, customer concentration, lack of written customer contracts, reliance on suppliers and other risks described herein and in the Company's AIF, which can be found at www.sedar.com. These forward-looking statements are made as of the date of release of this management's discussion and analysis, and the Company does not assume any obligation to update or revise them to reflect new events or circumstances.
