

SECURE MUSIC HARDWARE FOR BUSINESS IT

The CURIOPlayer Z8 is a compact, certified music player tailored for business IT environments.

Setting up in minutes, it provides out-of-box functionality and custom integration possibilities with PlayNetwork's APIs, while also supporting over-the-air software updates to keep your players secure and offering the latest capabilities.

Music content is stored locally to reduce network load and updates can be scheduled for whatever time you want. And by using the CURIOPlayer UI, you or your staff can browse, select, and change the music from anywhere in your store, hotel, restaurant, or venue.

CURIOPlayer Z8 Features

- Plug-and-play setup with auto-on and auto-play
- Uninterrupted playback of music from local storage
- Outbound-only communication over standard and secure network port 443
- Custom integrations
- Over-the-air software updates

Specifications:

Size: 4.7" x 4.7" x 0.95"
Weight: 7.6 oz / 216 grams

CURIOPlayer UI

Manage the music playback on your CURIOPlayer Z8 from most web-enabled computers, tablets, or smartphones.

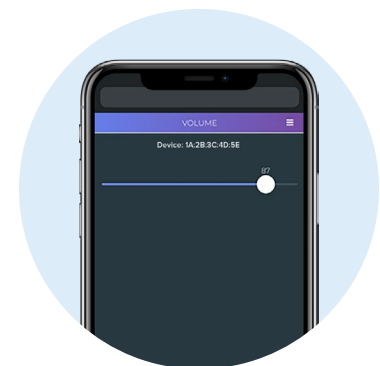

Channel View

View a list of available channels and update your queue.

What's Playing

The artist name and song title are displayed for the currently playing song.

Volume Control

Increase or decrease the volume easily without needing to access the hardware.
