CURIOPlayer X5

PLAYNETWORK®

The CURIOPlayer X5 is a compact media player that stores and deploys music and messaging in your business location. With only a 5" x 5" footprint and weighing less than a pound, the CURIOPlayer X5 is a small package that delivers big performance.

This versatile hardware enables uninterrupted content playback, quick installation, and fast content updates via network connection, making it the perfect pick for your overhead music and more.
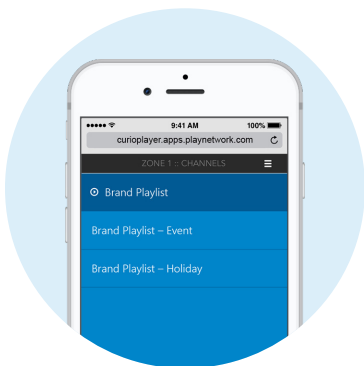

CURIOPlayer Features

- Dedicated, reliable hardware
- Easy plug-and-play setup in minutes on most networks
- Reduced hardware investment
- Uninterrupted playback from local storage (store-and-forward)
- Equipped with standard network ports
- Integration with PlayNetwork's expanding product offering
- Rapid and scheduled updates pushed via the cloud

CURIOPlayer Web UI

Manage your playlist and stations via a browser-based web app that can be accessed from most Internet connected devices, such as computers, tablets, or smartphones.

Channel View

View a list of available channels (if applicable).

What's Playing

The artist name and song title featured at the top of the screen indicates what's currently playing.

Volume Control

Increase or decrease the volume based on the level of ambient noise in your space.
